Dear Mr. Hughes and Mr. Scheel:

Thank you for your in-kind contribution of roof repair for our north Minneapolis alternative high school site. The board, staff, youth, and families served by the City, Inc. are grateful for your support. As you know, rain showers over several days caused a substantial amount of water to pour into our math classroom. Buckets and rugs were strategically placed throughout the classroom to catch and absorb the rain, but they were not sufficient. The puddles of rain on the classroom floor were unsafe, and the rain leaking onto the heads of our teacher and students was distracting, to say the least.

We needed an expert, so we called on Sela Roofing. We cannot overstate how much we appreciate your prompt and generous response to our dilemma. Your in-kind contribution of roof repair enabled us to provide a safe and dry learning environment for our students. The dry classroom has improved their morale, which we hope will translate into improved grades and higher test scores.

Your contribution was critical for The City, Inc. to continue helping young people and families build hope for the future. Through education, support, encouragement, and access to needed community resources, we provide our students and program participants the skills and tools necessary to build successful lives by overcoming situational and emotional barriers impeding their progress.

Again, thank you for your generosity.

Sincerely,

Fred Easter  
President/CEO

FND/ED
